CRYSTAL—Exquisite soft pink Cactus Dahlia

Hallauer's Select List of
Dahlias, Peonies, Gladioli and
Hardy Plants for 1923

GROWN AND FOR SALE BY

N. A. HALLAUER, Ontario, N. Y.

Announcement

IN issuing this new catalogue for the Spring of 1923, I take great pleasure in thanking my many friends for their generous patronage in the past and I hope to merit a continuance of their patronage.

I am always glad to welcome visitors to my gardens who are interested in hardy plants and flowers. My gardens are located on the improved Ridge Road, 17 miles from Rochester. Rochester and Sodus Bay car—Stop 60 is directly in front of the premises. It is only about five minutes' walk from Fruitland Station on the R. W. & O. R. R.

GUARANTEE—If I hope to retain trade, I can send only such stock as is true to name, first-class quality and in good condition when it leaves my place. Since I have no control over stock after it leaves my place, I cannot assume responsibility for failures due to improper planting or neglect after the plants have left my hands. I guarantee safe arrival of all stock sent by express. I also guarantee all stock true to name, and in a healthy growing condition when it leaves my hands. Any stock which proves otherwise will be gladly replaced or the price therefor refunded. I never substitute inferior varieties for those ordered, but should a variety ordered be sold out, I will fill the order with a similar or better variety, correctly labeled, unless instructions to the contrary are given in the order.

The prices quoted in this list are as low as is consistent with the quality of stock we send out. On account of the extreme shortage of some varieties it is **very important to order early**. Our stock of some of the choicest varieties is limited and it is often impossible to secure them late in the season.

When ordering, please write your **name, postoffice, county and state** plainly and give your nearest express office address, if it is different from your postoffice address.

Cut Flowers—During the blooming season we can generally supply cut flowers of Iris, Peonies, Gladioli, Dahlias and other hardy plants.

Kindly send me the names of your flower loving friends. I shall be glad to send them copies of my catalogue and will repay you by including extras with your order.

Make all remittances payable to

Gardens and American Express Office, Fruitland, N. Y.

DAHLIAS

CULTURE—The dahlia will grow in any good garden soil. A sandy or gravelly soil which need not be very rich suits them best. It should be worked deep and well prepared. Large quantities of manure should be avoided as it tends to produce a heavy growth of foliage at the expense of bloom. The roots should be planted 2½ feet apart, the tubers should be laid down flat and covered with four to six inches of soil. They may be planted as soon as frost is over, but in our climate, we have found the last half of the month of June, the best time in which to plant them out. During the last of August when the buds appear, an application of a tablespoonful of nitrate of soda spread about the base of the plant will be found beneficial in developing the blooms.

After the plants have been frozen in the fall, dig carefully and store the roots in a dry, cool cellar for winter. In the spring, the roots should be divided, preferably to one eye, before planting.

CLASSIFICATION OF DAHLIAS

CACTUS DAHLIAS—These are of recent introduction and are becoming very popular. In form they somewhat resemble the Chrysanthemum, the petals are long, narrow, incurved and sometimes twisted, giving them a very graceful appearance.

DECORATIVE DAHLIAS are the largest flowering of any type. They have long, broad, flat petals.

SHOW DAHLIAS are the old-fashionable large, round compact and quilled flowered type.

PEONY FLOWERED DAHLIAS are the newest type, and somewhat resemble the peony in form. The flowers are generally semi-double, exposing golden yellow disc in the center. They are very beautiful and free-flowering.

POMPON DAHLIAS are identical in form with show Dahlias, but are small.

SINGLE DAHLIAS have a single row of petals surrounding a golden yellow center. They are very graceful and free flowering.

COLLARETTE DAHLIAS are single Dahlias having a row of petals inside of the outside row.

Dahlias are sent by parcel post prepaid.

Cactus Dahlias

AMBASSADOR—Pure white, beautiful form..... Each, 35c.

AQUITANIA (Stillman)—Very large flowers of a beautiful salmon pink.

Good stems making it desirable for cutting or exhibition.. Each \$3.00

20th CENTURY—White at both base and tips, shading to rose pink at the center. Large..... Each, 25c.
WHITE CENTURY—Pure white; very large..... Each, 25c.

GLADIOLI

Gladiola are of very easy culture. The bulbs may be planted as early as the ground can be worked and for a succession of bloom every two weeks up to July. The ground should be dug deeply and the bulbs planted 4 to 6 inches deep. They may be planted in rows 1 foot apart and 5 or 6 inches apart in the rows. A sandy loam soil away from the shade of trees or buildings, suits them best, although they will thrive in any good garden soil.

One bulb of a variety at 1/10th the list price per dozen, prepaid.

ALICE TIPLADY (K)—A grand large Primulinus of beautiful orange saffron color Doz., \$2.50

Gladiolus bulbs are sent postpaid:—6 at the dozen rate and one at 1/10 the dozen price.

PEONIES

CULTURE—Peonies should be planted from the beginning of September until the ground freezes. We begin digging early in September and can ship any time until the ground freezes. They prefer a heavy loam soil although any good garden soil will give good results. It should be well drained and away from the shade of trees or buildings. The soil should be worked deep. Manure should either be incorporated in the soil some time before the roots are planted or used as a mulch during winter and worked into the soil in the spring. It should not be allowed to come in contact with the roots at any time. The roots should be planted with the eyes two or three inches below the surface of the soil. They are hardy and free from insect attacks. Early planting is to be recommended as it gives the plant a chance to get established before the ground freezes. Orders may be booked at any time for fall delivery. As the stock of some of the new and rare varieties is limited, early orders are advisable.

So far as possible we send strong one-year old plants; when this is impossible, we send divisions with three to five strong eyes which generally bloom the first year. Peonies do not come to their best until the third or fourth year and some varieties do not bloom until the second or third year after planting. We grow our own roots and guarantee them true to name.

Abbreviations used for the introducer's name are: (And.), Anderson; (Cal.), Calot; (Cr.), Crouse; (Del.), Delache; (Des.), Dessert; (Gr.), Guerin; (Kel.), Kelway; (Lem.), Lemoine; (Miel.), Mieliez; (Rich.), Richardson; (Ros.), Rosenfield; (Verd.), Verdier.
